

Yashvi M. Patel

Age : 21 Years

Sex : Female

PID : 221

Apt ID : 2025221

Ref. By : Dr. Hiren Shah

Study Date & Time:

08:03 PM 15 Sep, 2026

Report Date & Time:

08:28 PM 15 Sep, 2026

X-RAY CHEST

X-Ray Chest - PA View

- Bronchovascular markings are prominent and peribronchially thickened in bilateral lower lung fields.
- No focal lobar consolidation, cavitary lesion, or pneumothorax identified.
- Cardiac silhouette and mediastinal contours are within normal limits for age.
- Bilateral costophrenic and cardiophrenic angles are sharp and clear.
- Visualised osseous thoracic cage and soft tissue structures appear intact.

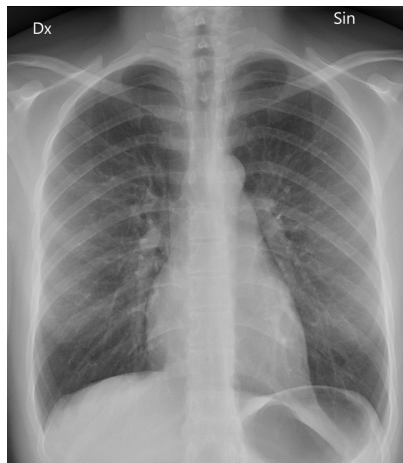

DISEASE IDENTIFIED:	Acute Bronchial Inflammation
TUMOR / SUB-TYPE:	Infective / Allergic Bronchitis
STAGE / PHASE:	Moderate Acute Phase (Bilateral Peribronchial Cuffing)

IMPRESSION

Bilateral prominent bronchovascular markings consistent with acute bronchitis (likely infective or allergic etiology). No acute consolidation.

ADVICE

Clinical correlation with auscultation findings, complete blood count, and symptomatic therapy.

Thanks for Reference
