BRAIN MRI WITH CONTRAST

Brain MRI - Axial T1/T2 & FLAIR

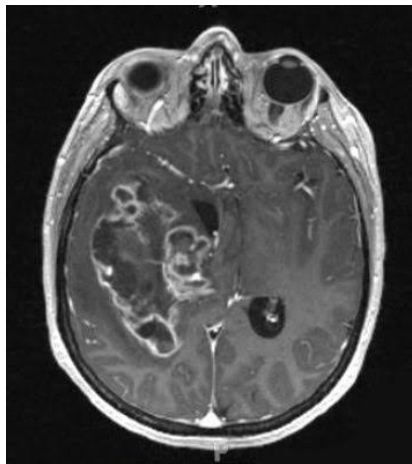

- Heterogeneously enhancing intra-axial mass in the right frontoparietal parenchyma.
- Perilesional vasogenic edema noted extending along white matter tracts.
- Compression and local effacement of the ipsilateral lateral ventricle.
- Midline structures show mild shift to the contralateral side.
- Posterior fossa and brainstem structures appear normal.
- Rest of the visualised cerebral parenchyma is normal.

IMPRESSION

Right frontoparietal intra-axial enhancing neoplasm with mass effect, suspicious for high-grade glioma.

ADVICE

Urgent neurosurgical consultation and post-contrast MRI spectroscopy.

Thanks for Reference
