## X-RAY CHEST

### X-Ray Chest - PA View

- Bronchovascular markings are prominent and peribronchially thickened in bilateral lower lung fields.
- No focal lobar consolidation, cavitary lesion, or pneumothorax identified.
- Cardiac silhouette and mediastinal contours are within normal limits for age.
- Bilateral costophrenic and cardiophrenic angles are sharp and clear.
- Visualised osseous thoracic cage and soft tissue structures appear intact.

### IMPRESSION

Bilateral prominent bronchovascular markings consistent with acute bronchitis (likely infective or allergic etiology). No acute consolidation.

### ADVICE

*Clinical correlation with auscultation findings, complete blood count, and symptomatic therapy.*

Thanks for Reference
